Version Control

Registration Data Set Specification Document Version Control			
Version	Date:	Author/Organization:	Comments
V0.8	15/06/2015	Linda Marshall/NSIP	Updated specification for Main School Flag; Length increased to Max 2, and 'Y' should be treated as '01' and 'N' as '02'
V0.9	22/6/2016	Linda Marshall/NSIP	Updated Year Level Validation and Valid values, updated length of Campus and State/Territory, changed column title 'Suggested length' to 'Suggested MAX length', Student Year Level – removed '0' as 'P' is used, Local Campus ID – increased max length to 10
V0.91	29/06/2016	Linda Marshall/NSIP	Updated lengths to allow for GUIDs in Identifier elements and increased length of Staff Email address after ESA Feedback. Age validation further clarified.
V0.92	01/03/2016	Linda Marshall/NSIP	Added CSV Header Information and Updated Artefacts.
V0.93	09/03/2016	Anthony Yaremenko / NSIP	Modified CSV column headers to match file spec provided by ESA
V0.94	23/03/2016	Linda Marshall/NSIP	Added additional fields available from SRM Confirmed validation of Language against 'Narrow Groups' ASCL Table 1.3 Added WA to list of States/Territories Modified ASL/ACARA ID, Other School ID, Reporting School ID to be type Integer, max field length 10, updated examples for Students and Staff. Modified 'Main School' valid values to include '1' and '2' as leading 0's may be stripped
V0.95	14/04/2016	Linda Marshall/NSIP	Corrected description of Parent Employment as per the Data Standards Manual http://www.acara.edu.au/verve/resources/DSM_6_Tech.pdf
V0.951	14/04/2016	Linda Marshall/NSIP	Changed 'Present' to 'Participating' in valid values for Participation Data Fields.
V0.96	05/05/2016	Linda Marshall/NSIP	Updated the reference to Languages and Country of Birth. Table 1.3 leaves out additional values such as "Not Stated" or "Inadequately Described". Also updated description of non-school education for value 8.
V0.97	23/5/16	Anthony Yaremenko/NSIP Linda Marshall/NSIP	Updated section 5 – Additional information available from SRM following advice from SoNET Confirmed addition of Supplementary codes in reference to Country of Birth and Languages spoken.
V0.98	07/06/2016	Lyn Pecchiar/NSIP Linda Marshall/NSIP	Updated Year Level values to include 'F' (Foundation). Added more data validation rules from SoNET.
V0.99	29/11/2016	Anthony Yaremenko	Updated as follows: <ol style="list-style-type: none"> 1. The addition of an optional State/Territory field to student address information (optional field) 2. The removal of staff details from the registration specification 3. The modification of "Parent 2" details from mandatory to optional 4. The amalgamation of "Home Group" and "Class Code" fields into a single field supporting multiple values
V0.99C	1/12/2016	Linda Marshall	ClassCode is the SIF Element that should be used for NAPLAN Registration. Registration DS – ClassGroup. The type of this

			element is xs:normalizedString so can support multiple values as per 1.3 Data Set.
V1.00	5/12/16	Anthony Yaremenko	Updated business rules table following updates from ESA. Updated CSV header table to detail columns in correct order and highlight export fields (combined into single table). Updated State/Territory to max length 5. Updated file naming conventions for export files (section 2.2) School names updated to max length 255 Accepted all changes. Document made final.
V1.01	13/12/16	Lyn Pecchiar/NSIP	Updated PNP codes following update from ESA
V1.02	02/03/17	L Marshall/NSIP	Updates based on PTRT and edits by ESA
V1.03	07/03/17	Lyn Pecchiar/NSIP	Updates based on edits by ESA including adding section for PSI
V1.04	15/05/17	Nick Nicholas/NSIP	Remove Braille and Exemption validation rules that are internal to platform and irrelevant to registration records
V1.05	15/02/18	Anthony Yaremenko / NSIP	Added additional emphasis regarding valid “Year Levels” for NAPLAN Online Adjusted list of valid Disability Adjustment Codes (DAC Codes): Added ETD and OFF, removed BRA (refer section 4.6)

1. Introduction

1.1 Purpose

These guidelines are based on the v1.3 approved NAPLAN Online registration data set (updated November 2016) and address:

- the requirements for successfully importing NAPLAN registration data for students and staff into the Online National Assessment Platform; and
- for extracting NAPLAN registration data for students from the assessment platform

1.2 Terminology

Table 1.1: Terminology

Term	Definition
ACARA	Australian Curriculum and Assessment Authority
ESA	Education Services Australia (tasked with developing the assessment platform)
NSIP	National Schools Interoperability Program
OAWG	On line Assessment Working Group
SIF	Systems Interoperability Framework
SRM	Student Registration Management System
SSA	School Sector Authority (examples include the Department of Education Victoria)
TAA	Test Administration Authority (examples include the VCAA, BoSTES, QCAA)
PTRT	Platform Trial and Readiness Test

1.3 Additional files

This document is complemented by a number of files to assist with integration development.

Files include:

Filename	Description
NAPLANRegistrationDraft.xsd	Cut down version of the SIF Specification with only Student, Staff and School relevant objects contained within.
SchemaStudent.JSON	JSON Schema for Students
SchemaStaff.JSON	JSON Schema for Staff

1.4 Background – Assessment platform

The Australian Government Department of Education is funding Education Services Australia (ESA) to develop the Online National Assessment Platform ('the Assessment Platform') as part of a broader program of work that supports a range of assessment types including national online assessment. One of the components of the Assessment Platform is an online-based assessment delivery system. This system will allow for test creation and management using an existing item authoring system, user management and student registration, test administration, delivery, access and presentation of tests to eligible students, as well as scoring of these assessments and reporting for assessment events. Offline and low-bandwidth delivery solutions are also included as part of the overall assessment delivery system (outside the scope of this document).

Student Registration and Management

The Student Registration and Management (SRM) system (a sub-component of the assessment platform) will enable the registration of students to a specific online Assessment Program offered on the Assessment Platform via the Assessment Delivery system. The Student Registration and Management system handles the initial student registration data load, providing capability for Test Administration Authorities to load the registration data via file uploads or by integrating with various external systems (access to other users to upload registration data will be reviewed post 2017). It will provide TAAs with the capability to manage their student registration data in preparation for an assessment program.

2. Interface specifications

2.1 Import student registration data into the assessment platform

Business Functions Supported	Import of registration data into the assessment platform
Description	<p>This describes the importing of :</p> <ul style="list-style-type: none"> • a registration data file, exported from a TAA or other package that contains student registration data • The import can be a: <ul style="list-style-type: none"> ○ manual process initiated by TAA or other authorised users via the assessment platform (using CSV or XML files) ○ automated via SIF
Process or Function Pre-conditions	<ol style="list-style-type: none"> 1. The registration data has been exported by the TAA or other package. 2. When using CSV: <ol style="list-style-type: none"> 2.1 There is no naming convention required to be implemented for the student filename for upload. 2.2 A file extension of .CSV is required. 2.3 If the file contains a large number of students it may need to be compressed prior to upload. The “zip” file format is the only accepted compression format. 3. When using XML: <ol style="list-style-type: none"> 3.1 There is no XML file naming convention for the upload file containing student registration data. 3.2 A file extension of .XML is required. 3.3 The XML will comply with the SIF AU (1.4/3.4) standard available here. 3.4 Students will be represented via the StudentPersonal object. 3.5 The assessment platform’s SRM End-Point must be known and published 4. It is expected that data will be as clean and complete as possible prior to it being uploaded to the assessment platform. This data is expected to include all local, TAA and other identifiers. 5. The registration data set complies with the NAPLAN Online 1.3 registration data set specification as approved by OAWG in November 2016.
Process or Function Post-conditions	Student registration data is imported into the assessment platform.

2.2 Export student registration data from the assessment platform

Business Functions Supported	Export of student registration data from the assessment platform (may be used by stakeholders to download a current set of students from the assessment platform following Platform Student Identifier (PSI) allocation).
Description	<p>This describes the exporting of :</p> <ul style="list-style-type: none"> • A registration data file that contains student registration data • The export is expected to support a manual extract or a SIF Pull from the End Point and is expected to produce both: <ul style="list-style-type: none"> ○ A CSV formatted file ○ An XML formatted file
Process or Function Pre-conditions	<ol style="list-style-type: none"> 1. Student registration data has been uploaded to the assessment platform successfully previously 2. When using CSV: <ol style="list-style-type: none"> 2.1 The CSV file naming convention is export_<queue number>.csv eg export_2396.csv 2.2 The CSV file will conform to the specifications given in this document Student Import File – XML and CSV: 3. When using XML: <ol style="list-style-type: none"> 3.1 The XML will comply with the SIF AU (1.4/3.4) standard available here. 3.2 Students will be represented via the StudentPersonal object 3.3 The XML file naming convention is export_<queue number> .xml eg export_2064.xml.
Process or Function Post-conditions	Student registration data is exported from the assessment platform (includes Platform Student Identifier).

3. Data Validation

3.1 Import Validation Rules

The import of data into the NAPLAN Online Assessment Platform (SRM component) will undertake validation as per the *Assessment Platform - SRM - Student Registration Data Import Functional Requirements.docx*

More specifically relevant to the creation of the Import File, the following will be validated on import of data into the Assessment Platform (SRM component) and should be checked prior to attempting to import of student or staff data.

Note: PSI validation rules are available via the PSI Usage Guidelines document available on Quickbase.

SRM Business Requirement ID	Validation/rule that will be applied
BR0. General business rules for data import	
BR-0.1	A bulk upload of student registration data can take place at the tenant (jurisdiction/sector) level, region or school within the selected tenant folder.
BR-0.2	The PSI must be unique across all components of the Assessment Platform and across all Assessment cycles.
BR-0.3	All student records in the SRM must have a valid PSI whether supplied in the import file or generated by the system during the upload process.
BR-0.4	The algorithm/pattern generated by the system will be consistent across all components of the Assessment Platform. See Section 4.5 for algorithm details.
BR-0.5	Records that do not exist in subsequent loads (but are already present in the database) should not be deleted.
BR-0.6	A user may only cancel a pending upload file in the queue and not one(s) that has already started.
BR-0.7	Whilst attempting to cancel a pending upload, if it has started, the cancellation must be aborted and the user notified
BR-0.8	Upload file selection is restricted to CSV and XML file extensions
BR-0.9	The system does not restrict the user from uploading the same file or filename if previously imported
BR-0.10	The system will only display queues within the scope of the selected folder/group (tenant, region or school)
BR-0.11	The system will <i>not</i> update existing database record(s) with incoming data if the 'Update if Exists' flag is set to 'No'
BR-0.12	Subject to the BR1.-BR8., the system will update existing database record(s) with incoming data if the 'Update if Exists' flag is set to 'Yes'
BR1. Business rules for validation	
BR-1.1	The upload file must match the corresponding data schema as outlined in the registration dataset – including all valid values e.g.: Year level, Test level etc.
BR-1.2	The upload will fail if the data schema is incorrect and an exception report should be displayed on screen
BR2. Business rules for validation and direct match	
BR-2.0	Check all of BR-2.1–BR-2.12 before progressing to any 'go to' or 'goes to' business rule
BR-2.1	Match the record in the dataset to a record in the database on PSI + ASL School Identifier to determine if it's an update or new record. <ul style="list-style-type: none">If full match go to BR3 (PASSES)

SRM Business Requirement ID	Validation/rule that will be applied														
	<ul style="list-style-type: none">If ASL matches but no PSI found go to BR-6.1 (PARTIAL MATCH)If ASL matches but no match on PSI go to BR-6.2 (PARTIAL MATCH)If no match on ASL go to BR-8.1 (FAILS)														
BR-2.2	Validate incoming PSI against algorithm (Section 4.5) (if fails goes to BR-5.2)														
BR-2.3	Validate year level and test level match except where Year Level=UG (if fail goes to BR-5.3)														
BR-2.4	Verify year level and DOB against expected age range (if fail goes to BR-5.4)														
BR-2.5	Verify the test level is within the expected DOB age range where Year Level=UG (if fail goes to BR-5.4)														
BR-2.6	Validate the DOB is not greater than today's date (if fail goes to BR-5.5)														
BR-2.7	Validate that all, or none, of Parent2 fields contain data (if fail goes to BR-5.6)														
BR-2.8	Validate visa code, if entered, matches a Department of Immigration and Border Protection visa value (if fail goes to BR-5.7)														
BR-2.9	Validate FTE, if entered, should be decimal number ranging from 0.00 to 1.00 (if fail goes to BR-5.8)														
BR-2.10	Validate that booklet type is selected for an adjustment of 'BRA: Hardcopy' (if fail goes to BR-5.9)														
BR-2.11	Validate that an exemption reason is provided for the participation status of 'Exempt' (if fail goes to BR-5.10)														
BR-2.12	Validate that all mandatory fields have been supplied (if fail goes to BR-5.11)														
BR3. Business rules for second match (where BR-2.1 PASSES)															
BR-3.1	If a record(s) passes the first match (BR-2.1), check the Given Name + Last Name + DOB (data of birth) matches the existing record in the database														
BR4. Business rules for flagging (where BR-3.1 FAILS)															
BR-4.1	Flag the record(s) (QA Status) as the personal details (Given Name + Last Name + DOB) are about to be updated in this subsequent load														
BR5. Business rules for error handling (where any of BR-2.x FAILS)															
BR-5.1	Flag error and <u>do not process</u> a record where there is no match on ASL Identifier														
BR-5.2	Flag error and <u>do not process</u> a record where the PSI is invalid														
BR-5.3	Flag error and <u>do not process</u> a record where the <u>Year level</u> and <u>Test level</u> do not match, except where a student's year level is ' Ungraded ' (refer BR-5.4 for exception).														
BR-5.4	<p>Flag (QA status) and <u>process</u> record where the <u>year level</u> and <u>DOB</u> does not fall into the expected (19 month) age range:</p> <p>Algorithm to use:</p> <p>Year 3: From: 01/01/(CurrentYear-9) To: 31/07/(CurrentYear-8)</p> <p>Year 5: From: 01/01/(CurrentYear-11) To: 31/07/(CurrentYear-10)</p> <p>Year 7: From: 01/01/(CurrentYear-13) To: 31/07/(CurrentYear-12)</p> <p>Year 9: From: 01/01/(CurrentYear-15) To: 31/07/(CurrentYear-14)</p> <p>Examples:</p> <table><tr><th rowspan="2"></th><th colspan="2">Year 3</th><th colspan="2">Year 5</th></tr><tr><th>From</th><th>To</th><th>From</th><th>To</th></tr><tr><td>2017</td><td>1/01/2008</td><td>31/07/2009</td><td>1/01/2006</td><td>31/07/2007</td></tr></table>		Year 3		Year 5		From	To	From	To	2017	1/01/2008	31/07/2009	1/01/2006	31/07/2007
	Year 3		Year 5												
	From	To	From	To											
2017	1/01/2008	31/07/2009	1/01/2006	31/07/2007											

SRM Business Requirement ID	Validation/rule that will be applied				
	2018	1/01/2009	31/07/2010	1/01/2007	31/07/2008
	2019	1/01/2010	31/07/2011	1/01/2008	31/07/2009
	2020	1/01/2011	31/07/2012	1/01/2009	31/07/2010
	2021	1/01/2012	31/07/2013	1/01/2010	31/07/2011
	2022	1/01/2013	31/07/2014	1/01/2011	31/07/2012
		Year 7		Year 9	
		From	To	From	To
	2017	1/01/2004	31/07/2005	1/01/2002	31/07/2003
	2018	1/01/2005	31/07/2006	1/01/2003	31/07/2004
	2019	1/01/2006	31/07/2007	1/01/2004	31/07/2005
	2020	1/01/2007	31/07/2008	1/01/2005	31/07/2006
	2021	1/01/2008	31/07/2009	1/01/2006	31/07/2007
	2022	1/01/2009	31/07/2010	1/01/2007	31/07/2008
	Any students that fall outside the range will have their data imported, but be flagged to be checked.				
This flagging will not prevent a student from sitting NAPLAN. There will be some accelerated students, or students who are held back who will fall outside of the range, but they should be minimal.					
If a student's year level is 'Ungraded', and their test level corresponds to the expected student age as per the tables above, <u>process without warning</u> . If outside of the expected age range – <u>flag (QA status) and process</u> .					
BR-5.5	Flag error and <u>do not process</u> a record where the DOB is a date greater than today's date				
BR-5.6	Flag error and <u>do not process</u> a record where one or more, but not all , Parent2 fields contain data				
BR-5.7	Flag error and <u>do not process</u> a record where a visa code is invalid				
BR-5.8	Flag error and <u>do not process</u> a record where FTE is not a decimal or outside of the range of 0.00 to 1.00				
BR-5.11	Flag error and <u>do not process</u> a record where mandatory field has not been supplied				
BR6. Business rules for validating the PSI (where BR-2.1 PARTIAL MATCH)					
BR-6.1	If no PSI sent in the incoming dataset generate and assign a new identifier according to the algorithm in Section 4.5 and create new record				
BR-6.2	If PSI is valid but does <i>not</i> match an existing PSI + ASL School Identifier combination within the relevant school treat as new record				
BR7. Business rules for flagging					
BR-7.1	Flag (QA status) and <u>process</u> any records as possible duplicates that have the same Given Name, Last Name and DOB within the same school				

SRM Business Requirement ID	Validation/rule that will be applied
BR-7.2	Flag (in the backend) and <u>process</u> any records as possible duplicates that have the same Given Name, Last Name and DOB within different schools
BR8. Business rules for unflagging	
BR-8.1	Where the Given Name, Last Name or DOB of a possible duplicate student is changed and the student is no longer a possible duplicate of a student within the same school, unflag the relevant QA status
BR-8.2	Where the Given Name, Last Name or DOB of a possible duplicate student is changed and the student is no longer a possible duplicate of a student within another school, unflag in the backend for each affected record
BR-8.3	Where a DOB that was out of range is changed and is no longer out of range, unflag the relevant QA status
BR-8.4	Where a PSI/Other Id that was flagged as a mismatch is changed, and is no longer a mismatch, unflag the relevant QA status
BR-8.5	Where a student that has been flagged as ungraded is updated to a specific year level, unflag the relevant QA status

3.2 Test Data for Import

Test data for testing bulk Student Import can be found here:

Student CSV format: <https://github.com/nsip/registration-data-set/blob/master/400schools150students.csv>

Student XML format: <https://github.com/nsip/registration-data-set/blob/master/400schools150students.xml.zip>

4. Registration Data Set - Specifications

4.1 Student Import File – XML and CSV:

Elements labelled with

** - Source for definition and typing: ACARA Data Standards Manual, Student Background Characteristics. - <http://www.acara.edu.au/reporting/data-standards-manual-student-background-characteristics>;

*** The National Schools Statistics Collection (NSSC)

**** Previous Identifiers: “Previous Id” scope is a previous Registration in previous cycle that was/is known about by the supplying party, covers previous Identifiers from local schools, Sectors, Jurisdictions, TAAs and others.

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.1	Local School Student ID	M	Description: The student id assigned by and used by local school administrative system. Ideally a persistent Local Student Identifier from source system. Assumed this will be local per school Student Information System. Type: String SIF Mappings to StudentPersonal: LocalId SIF XML Tag: <LocalId> SIF XML Valid Type: String	36	<LocalId>ehfsp680</LocalId> Or <LocalId>de305d54-75b4-431b-adb2-eb6b9e546014</LocalId>	ehfsp680,

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.2	Sector Student ID	O	Description: An identifier applied by a school sector Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = SectorStudentId SIF XML Tag: <OtherId Type="SectorStudentId"> SIF XML Valid Type: String	36	<OtherId Type="SectorStudentId">62065</OtherId>	62065,
2.3	Diocesan Student ID	O	Description: A student identifier applied by a diocese Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = DiocesanStudentId SIF XML Tag: <OtherId Type="DiocesanStudentId"> SIF XML Valid Type: String	36	<OtherId Type="DiocesanStudentId">21274</OtherId>	21274,
2.4	Other Student ID	O	Description: Any other Student Identifier deemed useful for NAPLAN purposes. Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = OtherStudentId SIF XML Tag: <OtherId Type="OtherStudentId"> SIF XML Valid Type: String	36	<OtherId Type="OtherStudentId">36682</OtherId>	36682,

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.5	TAA Student ID	O	<p>Description: An identifier assigned by and used by TAA for NAPLAN processing</p> <p>Type: String</p> <p>SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = TAAStudentId</p> <p>SIF XML Tag: <OtherId Type="TAAStudentId"></p> <p>SIF XML Valid Type: String</p>	36	<OtherId Type="TAAStudentId">91049</OtherId>	91049,
2.6	Jurisdiction Student ID	O	<p>Description: An identifier which is applied state wide. Persistent Jurisdiction Student Identifier e.g. VSN for VIC; in this case, the Id may be only for the purposes of NAPLAN.</p> <p>Type: String</p> <p>SIF Mappings to StudentPersonal: StateProvinceId</p> <p>SIF XML Tag: <StateProvinceId></p> <p>SIF XML Valid Type: String</p>	36	<StateProvinceId>57690</StateProvinceId>	57690,

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.7	National Student ID	O	Description: Placeholder for a Nationally persistent Student Identifier. Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = NationalStudentId SIF XML Tag: <OtherId Type="NationalStudentId"> SIF XML Valid Type: String	36	<OtherId Type="NationalStudentId">2958</OtherId>	2958,
2.8	Platform Student ID	O	Description: Assessment platform student identifier Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = NAPPlatformStudentId SIF XML Tag: <OtherId Type="NAPPlatformStudentId"> SIF XML Valid Type: String	36	<OtherId Type="NAPPlatformStudentId">44724</OtherId>	44724,

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.9	Previous Local School Student ID ****	O	Description: Previous local student id assigned by and used by local school administrative system Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = PreviousLocalSchoolStudentId SIF XML Tag: <OtherId Type="PreviousLocalSchoolStudentId"> SIF XML Valid Type: String	36	<OtherId Type="PreviousLocalSchoolStudentId">39387</OtherId>	39387,
2.10	Previous Sector Student ID ****	O	Description: Previous identifier applied by a school sector Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = PreviousSectorStudentId SIF XML Tag: <OtherId Type="PreviousSectorStudentId"> SIF XML Valid Type: String	36	<OtherId Type="PreviousSectorStudentId">24295</OtherId>	24295,

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.11	Previous Diocesan Student ID ****	O	Description: Previous student identifier applied by a diocese Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = PreviousDiocesanStudentId SIF XML Tag: <OtherId Type="PreviousDiocesanStudentId"> SIF XML Valid Type: String	36	<OtherId Type="PreviousDiocesanStudentId">50670</OtherId>	50670,
2.12	Previous Other Student ID ****	O	Description: Previous other Identifier not listed elsewhere Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = PreviousOtherStudentId SIF XML Tag <OtherId Type="PreviousOtherStudentId"> SIF XML Valid Type: String	36	<OtherId Type="PreviousOtherStudentId">89972</OtherId>	89972,

Data Set#	Field name	M or O*	Description and SIF Mapping	Max Length	Sample XML	Sample CSV
2.13	Previous TAA Student ID ****	O	Description: Previous identifier assigned by and used by TAA for NAPLAN processing Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = PreviousTAAStudentId SIF XML Tag <OtherId Type="PreviousTAAStudentId"> SIF XML Valid Type: String	36	<OtherId Type="PreviousTAAStudentId">28437</OtherId>	28437,
2.14	Previous Jurisdiction Student ID ****	O	Description: Previous jurisdiction student identifier. Type: String SIF Mappings to StudentPersonal: OtherIdList/OtherId, OtherIdList/OtherId@Type = PreviousStateProvinceId SIF XML Tag: <OtherId Type="PreviousStateProvinceId"> SIF XML Valid Type: String	36	<OtherId Type="PreviousStateProvinceId">28007</OtherId>	28007,

4.2 Student File Summary (CSV) Import:

The below table lists the columns in field order as they appear in the import CSV file. Please note that, additional fields have been included which are typically populated by the assessment platform and available on export of registration data from the system. These are referenced by “Export” in the Reference column and typically include system generated indicators where the platform has found potential duplicate students or other issues with the data and will generally be ignored if altered by users and reimported into the platform (refer “Ignored by import process?” column). These columns are ignored by the import.

Additionally, care should be taken if dealing in registration datasets across both CSV and XML formats. In some cases (for example Class Group), the CSV header differs in name label to the relevant XML tag (in this case the CSV header of ClassGroup translates to the XML of <ClassCode>).

CSV Header	Reference #	Field name / Label (if different)	Type	Mandatory or optional	Max length	Note	Example	Ignored by import process ?
LocalId	2.1	Local School Student ID	String	M	36		de305d54-75b4-431b-adb2-eb6b9e546014	N

4.3 Student File Summary (CSV) Export

An export report can be run from the SRM. This export has additional information which is populated by the assessment platform and available on export of registration data from the system. These are referenced by “Export” in the Reference column and typically include system generated indicators where the platform has found potential duplicate students or other issues with the data.

The Export file has the following items with these column headers. This file cannot be re-imported into the platform without re-organising headers as per the Import Template in section 4.4.

CSV EXPORT Header	Reference #	Field name / Label (if different)	Type	Mandatory or optional	Max length	Note	Example	Ignored by import process ?
Local school student ID	2.1	Local School Student ID	String	M	36		de305d54-75b4-431b-adb2-eb6b9e546014	N

4.4 Template Import File

Bulk-Import-Learners
-20170228190744.csv

The excel file provides a Template for CSV import file noting that there are some fields that are specifically generated by the platform and are not required at import. Order of fields is not important as the import is driven by the column headers.

4.5 Platform Student Identifier

The Platform Student Identifier is generated and assigned by the Student Registration and Management system for the purpose of providing a unique 11 Alphanumeric character identifier with the following structure:

[Source Component ID] + [State Code (ST_CD)] + [8 digit value] + [Checksum digit]

R245883245E

4.5.1 Source Component ID prefix:

- a. Student **R**egistration and Management System = R
- b. Assessment **D**elivery System = D

4.5.2 State codes from the Australian Standard Geographical Classification (ASGC)

ST_CD	S/T
1	New South Wales
2	Victoria
3	Queensland
4	South Australia
5	Western Australia
6	Tasmania
7	Northern Territory
8	Australian Capital Territory
9	Other Territories

4.5.3 Sequentially generated 8 digit value

0-9 (10 numbers)	Selected number of times (x)	Number of permutations
10	8	100,000,000

4.5.4 Checksum digit

A checksum digit is calculated on the 8 digit value using the [Luhn algorithm](#) and then converted to an alpha letter using the following conversion mapping:

Checksum digit	Alpha letter
0	K
1	M
2	R
3	A
4	S
5	P
6	D
7	H
8	E
9	G

4.5.5 General PSI business rules

ID	Description
BR-1	The PSI must be a unique 11 alphanumeric character identifier
BR-2	The PSI must follow the PSI structure (as described in Section 4.5)
BR-3	The PSI must be unique across all: <ul style="list-style-type: none">• components of the Assessment Platform• Assessment cycles
BR-4	An existing PSI <i>may</i> be resupplied by TAAs (/schools) year on year for the student the PSI has been assigned to
BR-5	A PSI is to be auto-generated if one is not supplied for a student
BR-6	A student's PSI can be edited in the system by a user who has permissions to edit that student's record (in the event that the student's PSI is incorrect)
BR-7	A student's PSI can be updated via a data import to the system by a user who has permissions to import that student's data (in the event that the student's PSI is incorrect)
BR-8	Before the PSI is accepted, the system shall: <ul style="list-style-type: none">• validate the structure of the PSI (as described in Section 4.5)• check that the PSI is <i>not</i> already assigned to another student (duplicate PSI) If either of these fail the relevant student record is not processed and an error is flagged
BR-9	The system shall accept PSIs with a source component ID beginning with 'R' or 'D', subject to passing all other relevant PSI business rules

4.6 Disability Adjustment Codes

The following Disability Adjustment Codes (DACs) are available for use in 2018:

AAM: Alternative Items - both audio and motor assistive

AIA: Alternative items - audio

AIM: Alternative items - motor assistive

AIV: Alternative items - visual

ALL: Alternative items - Audio, visual and motor assistive

AST: Assistive technology

AVM: Alternative Items - both visual and motor assistive

COL: Colour contrast modification

ETA: Extra Time - 5 mins per 30 min or part thereof

ETB: Extra Time - 10 mins per 30 min or part thereof

ETC: Extra Time - 15 mins per 30 min or part thereof

ETD: Extra Time – double total test time

OFF: Braille, large print, black and white, electronic test format

OSS: Oral sign/support

RBK: Rest break

SCR: Scribe

SUP: NAPLAN Support person

Refer: ACARA Principal's Handbook
